Aesthetic Skin Treatments

Dermapen4 - Micro Needling

Dermapen 4 glides over the skin creating millions of fine, vertical fractional channels up to 104% faster than other microneedling pens. These channels can carry up to 80% more topical nutrients deeper into the skin. The micro-injuries trigger a natural process of repair, increasing the production of collagen and elastin and visibly improving a wide range of skin concerns. Featuring Advanced Oscillating Vertical Needle™ (AOVN) Technology - The needles puncture the skin in an up and down motion, for increased speed, precision and safety, oscillating at 120 revs per second.

Single Treatment (incl Dermaceutical Sheet mask)	60 min	R 1 650
4 Treatment Package (once every 4-6 weeks)	60 min	R 5 600
6 Treatment Package (once every 4-6 weeks)	60 min	R 8 400
Add Decollete area (per session)	10 min	R 300

Introducing the Brands

pHformula Clinical Facials

South-African developed, produced in Barcelona. This Dermaceutical range is all about Proton release inside the skin, to bring healthier cells to the surface. From the inside out. Please note that pHformula facials are resurfacing treatments and not considered traditional peels. Each facial is customized to the clients' needs, sensitivity & skin condition. This means treatment times are also changed accordingly and as needed during the facial.

Exuviance Treatments

Exuviance Skin Care was created by the founding Dermatologist partners of the NeoStrata Company Inc. They discovered the anti-aging benefits of Glycolic Acid and created and patented the first Glycolic Peel. This innovative range contains only clinically proven ingredients, supported by independent, peer-reviewed scientific articles in major medical and cosmetic dermatology journals – the highest professional marker for any product. The range includes botanicals and offers a variety of anti-ageing ingredients including Alpha and Poly Hydroxy Acids, Retinol, Peptides, Neoglucosamine. and antioxidant-based products which exfoliate, moisturise and protect the skin for optimum skin health and youthful radiance.

Dermapen & Dr Pen – Microneedling and Nano Needling

Microneedling is a skin micro-needling treatment with minimum downtime which promotes scarless healing and natural collagen production in the skin to improve the appearance of scars, acne scarring, stretch marks, wrinkles, pigmentation and rejuvenate the skin. Topical Numbing is applied to the area before treatment to ensure comfort, but better results are derived when performed without any numbing. The client is given a choice in this regard.

Lamprobe Blemish Removal

The Lamprobe is a multi-dynamic instrument for non-invasive and minimally invasive, bloodless surgical removal of skin lesions. Epidermal lesions, within the scope of practice of the Somatologist, can be safely and effectively removed on all skin types with selected probes. The future of skin care is moving away from invasive, burning devices that scar or pigment the skin. Clients and patients expect optimal results in an era of advanced technology. The Lamprobe delivers results every time.

Based on radio wave and high frequency technology, the Lamprobe works on the principal of liquids being attracted to heat, released by various sized and shaped robes for the treatment of all types of different lesions. What distinguishes the Lamprobe from other devices, is the delicate yet sophisticated regulated intensity focusing on the lesion alone and not the underlying or surrounding skin.

Plasma Pen- Fibroblast Skin Tightening

Plasma Pen is the world's most advanced, non-invasive, skin lifting, skin tightening, and rejuvenation device used to treat wrinkles, and sagging, dull skin. The Plasma Pen is an FDA approved, CE approved device used to perform fibroblast therapy, a technique used to stimulate production of collagen in the skin. A small spot is left behind to heal, where Carbonisation took effect, tightening the skin around it. Down time is expected, and can take from 5 days to 14days, depending on each individual.
